Meteorologist's View

With very high UV levels it is important to be prepared by wearing and taking plenty of protective wear. With further warm weather and high humidity levels, plenty of water will be required as lengthy exposure to strong sunshine and high temperatures can cause exhaustion and dehydration. During the afternoon, any isolated thundery showers may cause gusty winds for a time, and slippery paths and surfaces, so take care while hiking.

Recent rainfall: measured at Neuadd: altitude 353m
